

This is a digital copy of a book that was preserved for generations on library shelves before it was carefully scanned by Google as part of a project to make the world's books discoverable online.

It has survived long enough for the copyright to expire and the book to enter the public domain. A public domain book is one that was never subject to copyright or whose legal copyright term has expired. Whether a book is in the public domain may vary country to country. Public domain books are our gateways to the past, representing a wealth of history, culture and knowledge that's often difficult to discover.

Marks, notations and other marginalia present in the original volume will appear in this file - a reminder of this book's long journey from the publisher to a library and finally to you.

Usage guidelines

Google is proud to partner with libraries to digitize public domain materials and make them widely accessible. Public domain books belong to the public and we are merely their custodians. Nevertheless, this work is expensive, so in order to keep providing this resource, we have taken steps to prevent abuse by commercial parties, including placing technical restrictions on automated querying.

We also ask that you:

- + *Make non-commercial use of the files* We designed Google Book Search for use by individuals, and we request that you use these files for personal, non-commercial purposes.
- + *Refrain from automated querying* Do not send automated queries of any sort to Google's system: If you are conducting research on machine translation, optical character recognition or other areas where access to a large amount of text is helpful, please contact us. We encourage the use of public domain materials for these purposes and may be able to help.
- + *Maintain attribution* The Google "watermark" you see on each file is essential for informing people about this project and helping them find additional materials through Google Book Search. Please do not remove it.
- + *Keep it legal* Whatever your use, remember that you are responsible for ensuring that what you are doing is legal. Do not assume that just because we believe a book is in the public domain for users in the United States, that the work is also in the public domain for users in other countries. Whether a book is still in copyright varies from country to country, and we can't offer guidance on whether any specific use of any specific book is allowed. Please do not assume that a book's appearance in Google Book Search means it can be used in any manner anywhere in the world. Copyright infringement liability can be quite severe.

About Google Book Search

Google's mission is to organize the world's information and to make it universally accessible and useful. Google Book Search helps readers discover the world's books while helping authors and publishers reach new audiences. PREFATORY NOTE.

THE ANNUAL LIBRARY INDEX, of which the present is the initial volume under that title, is a continuation of the Annual which has been published since 1892 as the "Annual Literary Index" and is, from that point of view, the 14th volume in a continuing series, the size and outward form being the same. The difference is that the publication is this year based upon the method of the periodical *Library Index*, started with the beginning of 1905, which makes entry by author and title, and subject, when not indicated in the title, instead of simply by title with separate author index. Italics are used to distinguish fiction in this alphabet.

This method, although it is based in general upon the Poole system of indexing, instead of book-cataloging methods, presents definite advantages over the system of the American Literary Index, as will readily be found in practice. It increases in large measure the scope of the work, and it has been impracticable to include as many periodicals as were included under the old system. It is intended, however, to include in the five-yearly Poole, issued under the editorship of Mr. Fletcher, a larger range of periodicals than hitherto included in the present Annual.

Although the general scope of the "Annual Literary Index" and, to some extent, its details from year to year, had been planned by the undersigned as associate editor with Mr. Fletcher, the actual work of the ancillary departments has been done by Miss H. E. Haines, managing editor of *The Library Journal*, and it seems, therefore, but fair that in commencing a new series under the new title her name should replace my own as the associate of Mr. Fletcher in the preparation of the work.
